SYMBOLFOTO

SPECIFICATION

- Lightweight and compact double articulated aerial platform for working in confined spaces, installed on a 3.5 t lorry.

The double pantograph ensures great versatility and the ability to overcome obstacles at height.

- Multifunction electric controls for greater precision, speed and manoeuvring comfort
- Vertical stabilisation with extendable front crossbars to better compensate for uneven ground and slopes.
- Platform with three stabilisation options for all working conditions:
 - In profile: for maximum compactness in confined spaces.
 - With front crossbars extended: for maximum performance when working at height.
 - Partial stabilisation: for maximum performance with minimum space requirements.
